

Gryllefjord breakwater, Norway

Description: Construct a rock barrier as protection for the town quays. The rock is taken from a new quarry, located some 140 m above the harbour. The rock is initially stockpiled in Sildevika and the bulk then taken by boat directly to the barrier. The road from the quarry to the stockpile is a public road that must be upgraded before transport can commence.

Main quantities:

Rock for barrier, total	620.000 m ³
Transported by sea	520.000 m ³
Transported over land	100.000 m ³
